Message from the Regional Director

2016 was a landmark year for the IUCN Washington D.C. Office, as IUCN held the World Conservation Congress (WCC) in the United States for the first time ever. With over 10,000 participants, the WCC was the largest conservation conference ever held in the United States. The Washington D.C. Office was a key office for supporting the WCC, including through fundraising from U.S.-based donors, supporting administrative and finance logistics, and advancing several important new initiatives.

The 2016 WCC saw the launch of the IUCN U.S. National Committee (USNC) and the Coalition for Investment Private Conservation (CPIC), the culmination of many hours of work by IUCN Washington D.C. staff, members, and partners. It is becoming increasingly apparent that the scale of investment in conservation needs drastically increase in future years in order to preserve biodiversity, support sustainable livelihoods, and contribute to climate change mitigation and adaptation. This requires new partnership spaces to enable identification of opportunities for synergy and scaling up, as well as innovative finance mechanisms to unleash the private sector as an agent of conservation. CPIC will develop blueprints for return seeking investment in conservation and increase the number of new projects flowing into the investment pipeline. The new U.S. National Committee provides a neutral convening space for IUCN's U.S. Members to discuss their respective priorities and efforts, identify complementarities and partnership opportunities.

The Washington D.C. Office plays an important role in hosting several IUCN

programs and supporting their engagement with U.S.-based donors. The Wildlife Trafficking Response, Assessment and Priority Setting (W-TRAPS) project, supported by the U.S. Agency International Development (USAID) and managed by the Washington D.C. Office, was extended to 2020 and given additional funding; the mission of the Gender Equality for Climate Change Opportunities (GECCO) supported by project, **USAID** implemented by the IUCN Global Gender Programme, was expanded and it was also given additional funding. The Washington D.C. Office supported the Asia Regional Office (ARO) and the Eastern and Southern Africa Regional Office (ESARO) in receiving two grants from the U.S. Department of State's Bureau of Oceans and International Environmental and Scientific Affairs.

Overall, the Washington D.C. Office demonstrates a strong commitment to the One Programme approach, maintaining good relationships with U.S. Members, facilitating the work of multiple IUCN Global Programmes, and supporting the six IUCN Commissions. As we review the successes of 2016, we look forward to continuing to work towards a just world that values and conserves nature in 2017.

Dr. Frank Hawkins

Director

Washington D.C. Office

IUCN

IUCN at a Glance

IUCN is a membership Union uniquely composed of both government and civil society organisations. It provides public, private and non-governmental organisations with the knowledge and tools that enable human progress, economic development and nature conservation to take place together.

Created in 1948, IUCN is now the world's largest and most diverse environmental network, harnessing the knowledge, resources and reach of more than 1,300 Member organisations and some 10,000 experts. It is a leading provider of conservation data, assessments and analysis. Its broad membership enables IUCN to fill the role of incubator and trusted repository of best practices, tools and international standards.

IUCN provides a neutral space in which diverse stakeholders including governments, NGOs, scientists, businesses, local communities, indigenous peoples' organisations and others can work together to forge and implement solutions to environmental challenges and achieve sustainable development.

Working with many partners and supporters, IUCN implements a large and diverse portfolio of conservation projects worldwide. Combining the latest science with the traditional knowledge of local communities, these projects work to reverse habitat loss, restore ecosystems and improve people's well-being.

Our Vision

A just world that values and conserves nature.

Our Mission

To influence, encourage, and assist societies throughout the world to conserve the integrity and diversity of nature and to ensure that any use of natural resources is equitable and ecologically sustainable.

Strategic Orientation

The IUCN Washington D.C. Office is an outpost of the **IUCN** Secretariat headquartered in Gland, Switzerland, and houses core regional activities (i.e. those directly related to members, partners, and initiatives in North America and Washington D.C.) as well as a collection of IUCN and partner programs with scopes beyond North America. The latter – including staff that share Washington D.C. Office space but are not involved in core regional activities comprise the following programmes and entities. Their 2016 activities are reported elsewhere.

- The Biodiversity Assessment Unit, established in 2001, is a collaborative project between IUCN and Conservation International with the mandate of expanding the taxonomic and geographic coverage of the IUCN Red List.
- Ecosystem-based adaptation (EbA) involves a wide range of ecosystem management activities to increase resilience and reduce the vulnerability of people and the environment to climate change. Functioning globally through **IUCN** Country Offices (and Washington D.C. Office), Members, and partners, IUCN promotes the use of biodiversity and ecosystem services as a part of an overall climate adaptation strategy both at the policy and practice level.
- Staff from the Global Forests and Climate Change Programme sitting in the Washington D.C. Office largely focus on Forest Landscape Restoration (FLR). Forest landscape restoration is the ongoing process of regaining ecological functionality and enhancing human wellbeing across deforested or degraded landscapes.
- The Global Gender Office provides innovative approaches, technical support, policy development, and capacity building to ensure gender equality is

- central to sustainable global environmental solutions.
- The Global Island Partnership is a voluntary partnership for all islands, regardless of size or political status, to take bold steps to build resilient and sustainable island communities through innovative partnerships. It provide a global platform that enables islands to work together to develop solutions to common problems and to take high-level commitments and actions that address these global challenges.
- The mission of the Global Marine Community: Americas is to promote communication and build partnerships across the Global Marine Community and to identify and address gaps in the community's work. The Global Marine Community achieves this through multimedia promotion and partnerships, and consists of a diverse and growing group of participants. The Global Marine Community is an evolution of the long-standing D.C. Marine Community funded by the Munson Foundation.
- The Integrated Biodiversity Assessment Tool (IBAT) is a multi-institutional programme of work delivered by a BirdLife consortium composed of International, Conservation International, IUCN, and UNEP-WCMC. IBAT helps businesses incorporate biodiversity considerations into key project planning and management decisions by providing a basic risk screening on biodiversity, information drawing on globally recognised biodiversity information from a number of the consortium's Knowledge Products together into an interactive mapping tool. In 2016 the Secretariat, currently hosted in Washington D.C., will move to Cambridge, UK.
- IUCN maintains a formally accredited Permanent Observer Mission to the UN.

IUCN is the only international observer organisation in the UN General Assembly with expertise in issues concerning the environment, specifically biodiversity, nature conservation, and sustainable natural resource use.

 Supported by a small Secretariat based in the Washington D.C. Office, the Sargasso Sea Commission promotes international awareness and scientific research of the Sargasso Sea. The result of three years of work by the Sargasso Sea Alliance, the Commission operates as a stand-alone legal entity established by Bermudian and US law.

The Washington D.C. Office core staff cover several areas of work, including membership coordination, development, management, and engagement with USbased financial institutions, including the International World Bank, Finance Corporation, and the Natural Capital Finance Alliance. The Washington D.C. Office administers and serves US and Canadian Member organisations, and also serves as a liaison resource to IUCN Commissions. As of December 2016, IUCN has 118 Members in North American, and nearly 3,500 individual Commission Members are based in the US and Canada.

US The Government and US-based philanthropies and civil society organisations are critical contributors to global nature conservation and sustainable development. A major function of the Washington D.C. Office is developing strategic partnerships with UScharitable foundations and US Government agencies. In fact, several of IUCN's Members are also donors. The Washington D.C. Office plays a critical role in managing grants awarded by US-based institutions.

2016 culminated with the World Conservation Congress in Hawai'i, from 1-10 September. The World Conservation Congress was the largest conservation convention ever held in the US, with over 10,000 participants from 180 countries and 1,380 sessions. The Washington D.C. Office provided support both during and in the lead up to the Congress.

Programme Work and Achievements: One Programme

In 2016, the United States hosted the World Conservation Congress in Hawai'i, the largest conservation convention ever held in the United States. The WCC assembled more than 10,000 participants, including presidents, ministers, scientists, business representatives and thousands of representatives from government and non-governmental organizations (NGOs).

IUCN members approved 106 resolutions and recommendations aimed at improving the governance, programmes, and policies of the Union, and presented the Hawai'i Commitments: globally transformative and innovative conservation initiatives to meet the critical challenges and opportunities of our time, including the imperative to scale up action on biodiversity and the SDGs.

The IUCN World Conservation Congress also saw the approval of the new IUCN Quadrennial Programme 2017-2020. The IUCN Programme provides the framework for planning, implementing, monitoring and evaluating the conservation work undertaken by the Commissions and the Secretariat with and on behalf of IUCN Members. It was developed through a nine month consultation process.

The atmosphere in the Hawai'i Convention Center in September 2016 was of an extraordinary energy for conservation. The enduring legacy of the Congress will be the Hawai'i Commitments which set the agenda for delivery of the Sustainable Development Goals from the perspective of the IUCN membership. The detailed Congress report gives full details of the key events, as well as many photos and accounts of specific outputs.

With the election of two Commission Chairs located in the US – Kristen Walker for CEESP and Sean Southey for CEC – we anticipate

more direct engagement with these two commissions and their members.

In elections for the North America and Caribbean Regional Councillors, Sixto J. Incháustegui, Dominican Republic; Rick Bates, Canada; and John Robinson, USA were elected.

The Washington D.C. Office provided extensive support in the lead up to and during the World Conservation Congress. Craig Beatty, Washington D.C. Programme Officer, served on the Motions Core Team, which included representatives from across IUCN. The Motions Core Team developed a new online process for accepting, revising, and voting on motions for the 2016 World Conservation Congress and supported motions through the drafting, revision, and finalization process. The IUCN Washington D.C. Office led two major themes at the Congress, on biodiversity and agriculture and on private finance for conservation (see below).

The D.C. office is working closely with the World Bank on a range of issues related to finance and biodiversity. In order to consolidate our collaboration, the DG signed an MoU with World Bank President Jim Kim at the Paris UNFCCC conference of parties in December The MoU 2015. covers collaboration on general biodiversity issues, including flagship species conservation efforts, use of IUCN-convened data sets for biodiversity risk screening, and collaboration on analysis of the benefits of nature to humanity, with a focus on costs and benefits of different development approaches.

IUCN in Washington has, throughout the year, supported the work of the Expert Group on Biodiversity that is contributing input to the World Bank Safeguards Review.

Significant Events

The Washington D.C. Office held two high level events at the 2016 World Conservation Congress. The first was a High Level Biodiversity and Agriculture Lunch "Food Systems: The Nexus of Our Planet's Most Critical Issues" followed by a panel session "Feed the planet and conserve biodiversity: yes we can!" during the Member's Assembly. The lunch event focused on the following nine themes, each led by a distinguished panellist:

- Increase our knowledge of food systems (Guillermo Castilleja);
- Establish global goals (Jeffrey Sachs);
- Re-direct the sector (Peter Bakker);
- Preserve biodiversity (Braulio Dias);
- Produce more and better food with lower environmental impact (Jeff Seabright);
- Highlight agriculture's dependence on ecosystems and biodiversity (Norbert Kurilla);
- Promote more nutritious and equitable food production and access to food (Ashok Khosla);
- Facilitate transparency and traceability (Aileen Lee); and
- Harness the power of economics (Pavan Sukhdev).

The Washington D.C. Office also organized a High Level Dialogue "Private Finance for Public Good," leading to the launch of the Coalition for Private Investment in Conservation (CPIC), with 25 IUCN members joining. The goal of the Coalition is to increase the flow of private finance into conservation through the engagement of the finance community and the development of new projects into the investment pipeline.

The core of the Coalition is formed around a set of working groups, focusing on the following topics: coastal resilience, forest landscape conservation and restoration, green infrastructure for watershed management, sustainable agricultural intensification, and sustainable coastal fisheries.

In addition, the US National Committee was created at the World Conservation Congress, the culmination of a great deal of work by the US office and by some devoted member organisations, including the Wildlife Conservation Society and The Rainforest Trust. The next steps for mobilization of the Committee are Council approval and the election of an executive committee and chair. This is a goal that has long been sought after, dating back to the creation of the IUCN office in the United States.

Strategic Partnerships

The Washington D.C. Office, in partnership with IUCN's Strategic Partnership Unit, manages IUCN's interface with US donors, including the US Government, US foundation, and philanthropic individuals. Our engagement with US institutions is critical for IUCN's work around the world.

IUCN works closely with the US State Department, a Member since 1990, on a number nature-based sustainable of development and conservation objectives. In 2016 this partnership supported work on species conservation, marine ecosystems, ecosystem management, forests, terrestrial protected areas, and wildlife trafficking. The State Department also supported two projects focusing on water, Strengthening trans-boundary water governance cooperation in the IGAD region and Measuring, Understanding and Adapting to Nexus Tradeoffs in the 3S River Basins, in the Horn of Africa and the Lower Mekong, respectively.

The United States Agency for International Development (USAID) is also an IUCN Member and a valued partner. Using its Public International Organisation status, IUCN partners with USAID to design programs and develop scopes of work of mutual interest to both institutions. Advancing Gender in the Environment (AGENT) and Wildlife Trafficking Response, Assessment and Priority Setting (W-TRAPS), with the IUCN Global Gender Office and Traffic International respectively, and two such partnerships.

An important partnership in Washington D.C. is that with International Union for Conservation of Nature – United States (IUCN-US), a 501(c)(3) organisation that is legally distinct from IUCN. For over 25 years, IUCN-US has been supporting IUCN and its global network of members and partners. Because it is a charity registered in the US, IUCN-US is often indispensable to IUCN and its partners in engaging with other US-based institutions.

The Washington D.C. Office was very active in 2016 in supporting fundraising with U.S.-based donors for the World Conservation Congress. For a list of IUCN donors in 2016, please see the <u>IUCN 2016 Annual Report</u>.

Members and Commissions

IUCN has robust membership in North America. In the United States this network comprises 118 members, including the State Member, six Government Agency members, 67 National NGO members, 31 International NGO members, 11 Affiliate members, and two Indigenous Peoples members. In Canada IUCN has a membership network of 22 members, including the State Member, three Government Agency members, 15 National NGO members, two Affiliate members, and one Indigenous Peoples member.

The IUCN Canadian Committee (CCIUCN) provides a focus for Canadian member organisations to support the IUCN. CCIUCN activities and goals include:

- developing the fullest possible communication and co-ordination among Canadian members of IUCN, and communication between IUCN and Canada and vice-versa;
- mobilizing the scientific and professional skills, practical experience and data of the Canadian official and voluntary bodies necessary to support the above;
- stimulating and fostering conservation and research leading to that end;
- serving as a clearing-house for dissemination of information from IUCN; publishing and
 disseminating appropriate information to help establish Canadian views in relation to
 matters raised by IUCN; this is without prejudice to the right of individual organizations to
 express an independent view, or of Canadian government agencies to give the official
 scientific and professional conservationist view; and
- assisting national and international conservation activities.

Following approval from the IUCN Council in early 2017, the newly formed United States National Committee will begin working to identify and act on priorities for IUCN's United States-based member.

IUCN Commissions

The *Commission on Education and Communication (CEC)* drives change for the co-creation of sustainable solutions through leading communication, learning and knowledge management in IUCN and the wider conservation community.

The *Commission on Environmental, Economic and Social Policy (CEESP)* provides expertise and policy advice on economic and social factors for the conservation and sustainable use of biological diversity.

The *World Commission on Environmental Law (WCEL)* advances environmental law by developing new legal concepts and instruments, and by building the capacity of societies to employ environmental law for conservation and sustainable development.

The *Commission on Ecosystem Management (CEM)* provides expert guidance on integrated ecosystem approaches to the management of natural and modified ecosystems.

The *Species Survival Commission (SSC)* advises the Union on the technical aspects of species conservation and mobilizes action for those species that are threatened with extinction.

The *World Commission on Protected Areas (WCPA)* promotes the establishment and effective management of a worldwide representative network of terrestrial and marine protected areas.

Regional Financial Summary

Income and Expenditure Statement for the Period January 1 – December 31, 2016 (US\$)

	Unrestricted	Project Agreement	Total
EXTERNAL OPERATING INCOME		J	
Membership dues	-	-	-
