

**Theme IV. — Relationship of ecology to landscape planning.**

(Certain resolutions proposed by Technical Meeting IV have been combined with Resolution No 2 of Theme III.)

No 1. — Within the framework of financial and technical assistance to under-developed countries, landscape-planning based on ecological research should be the starting point of the development programmes to be prepared, and for this purpose co-operation should be sought between I.U.C.N., U.N.O., F.A.O., Unesco and other specialist organizations.

No 2. — The Executive Board should study the possibility of setting up a Commission on landscape planning to co-ordinate landscape activities.
