

14. The Seventh General Assembly

- believing that a major threat to the existence of some rare animals is their illegal exportation from the country of origin, followed by their legal importation into other countries;
- warmly approves the action of those countries which have restricted the importation of such animals;
- now resolves that the International Union for Conservation of Nature and Natural Resources should urge all governments who do not yet restrict the importation of rare animals in harmony with the export laws of the countries of origin, to do so now and thereby support the efforts of those countries to preserve animals in danger of extermination.
